

Compact Laser Automatic Label Feed

Pryor's automatic label feed is for use with a Cabinet Laser for metal or plastic label marking. The system removes the need to purchase pre-printed labels by enabling the user to configure a unique, fully customisable layout for different products or brands. The automatic label feed allows the user to easily load a supply of plain metal labels into the fixture and leave the laser marking, to permanently engrave a series of Data Matrix Codes or Serial Numbers. Watch our video to see metal label marking in action.

Avoid Duplicate Serial Numbers

The Pryor Cabinet Laser can be used for permanent laser marking of unique part identifiers and Data Matrix codes. The software can automatically check within its own, or external data sources for duplicate information, ensuring that no 2 labels can be marked with the same data. Operators are able to import a database of serial numbers or use Pryor Software for unique serial number marking.

Laser Marking Machine

The Pryor Cabinet Laser is a bench mounted laser engraving machine. Laser engraving, otherwise known as laser etching or laser marking, offers a non-contact form of permanent marking. It is the fastest and most versatile marking system and is therefore suitable to high volume and high variety output. Laser engraving provides excellent precision on a wide range of materials.

Pryor also provide automatic label feeds for Dot Peen marking machines.

Overview

- easily configurable for different sizes of label
- avoid duplicate serial numbers
- data matrix laser marking
- eliminates the need to purchase pre-printed labels
- configure a unique, fully customisable layout
- product or brand specific labels
- import serial numbers from an external database
- use Pryor software to generate unique serial numbers and data matrix codes

Our Solutions

- Traceability & Data Capture Solutions
- Automated Part Marking
- Aerospace Part Marking Standards
- Vehicle Identification Number (VIN) Marking
- Hand Tools for Marking & Identification
- Serial Number Marking
- Logo Marking Solutions
- Production Data Monitoring
